EXPERIENCE

Software Developer - CANDDi
03.2020 - present
Building applications with JavaScript, PHP and MySQL.

- UI (with Bacbone.js - jQuery, HTML - Handlebars, CSS)
- REST APIs
- AWS lambda functions (with Node.js),
- AWS services and their SDKs: S3, CloudFront, SES
- cronjobs (with PHP),
- RabbitMQ - working in a pub/sub event driven architecture
- processing CSV, XLS files

ACHIEVEMENTS

01 With the guidance of my CTO I have successfully implemented a form generator enabling the sales team to set up landing pages with just a few clicks (including purchasing the domain, SSL, Cloufront distribution)

02 Refactored our serverless handlers and successfully reduced the number of errors / timeout issues by approximately 80%

03 Contributed to a large percentage of the unit test coverage increase and now the pass rate is a minimum of 87% during build time (PHP)

SKILLS

01 **GitHub - git**
Working in a team with GitHub and git for version control

02 **JIRA**
I am used to working in an Agile environment using JIRA to track projects

03 **DBeaver**
DB tool I use to run and build MySQL queries

04 **Docker, Kubernetes, Grunt, Jenkins**
On an ad-hoc basis I have completed automation/configuration tasks which involved writing YAML config files, adding tasks in Grunt, updating Jenkins configurations

05 **Ubuntu**
I am experienced working on a Linux distribution

EDUCATION

FreeCodeCamp
2017 - 2021

University of Pannonia
2008 - 2012

Faculty of Economics BA, Business/Managerial Economics

Principal subjects: Economics, Mathematics, Probability Theory and Mathematical Statistics
